

Tatarusanu Ioana

I am a person who works hard, I adapt easily to the new and I want to learn as much as possible.

Work experience

Automation business engineer

Nov 2020 - Present

Expleo Romania, Iasi

The main activities and responsibilities:

- Participate to the writing of technical business specifications for the needs (writing specifications, consultations,...):
- Ensure the follow-up of the studies and the realization (at the supplier's and installation site);
- Receive the installations for the "automation" perimeter;
- Relation with the Engineering Process pilots and the interlocutors of Engineering Process;
- Relations with the other Engineering Process partners (Handling, engineering, logistics,...) and the "Factory" teams (manufacturing, maintenance, IT);
- Relations with the external suppliers;
- Verification of electrical diagrams according to standard Stellantis procedures;
- Control of deliverables specific to each project,
- Application of standards and procedures,
- Participation in meetings with suppliers and hierarchical responsibilities in France.

Depending on the phase of the business process, the defined services and the different projects, the following tasks will be considered:

During the study phase of the equipment

Objective: To obtain a finalized technical file that considers the needs and specifications requested, therefore avoiding the questioning in realization.

During the provisional phase - realization at the supplier's site

Objective: Ensure that the manufacturing and tests that may be realized at the supplier as well as the associated documentation comply with the requirements and the schedule.

During the assembly phase - on site implementation

Objective: Ensure that the assembly of the installation on site and the associated documentation comply with requirements and the schedule.

During the tests phase - Provisional Acceptance

Objective: To obtain an installation complying with the requirements of the technical specifications in order to start production in optimal conditions.

During the Ramping-up phase

Objective: To bring the installation to the expected performances and with a definitive documentation in order to be able to deliver the installation to the Beneficiary Plant.

Work&Travel America

May 2018 - Sep 2018

Michigan

Summer program for students in America.

Internship

Jun 2019 - Jul 2019

Veolia, Iasi

I participated in the student internship program, for 3 weeks I got to know the company. Veolia is the world's leading provider of water, energy and sanitation services. In Romania, Veolia provides drinking water supply and sewerage services as well as energy services.
